

## A simple solution to manage your members, events and fundraising activities

Smart Trakker customizes the customer experience to meet the specific needs of your at-risk populations, case workers, events and fundraisers.

Our browser-based management system provides nonprofits and companies an intuitive approach to administering their assistance data and internal workflow using Smart Trakker modules.

Track assistance activities with flexible data points and consolidate your data into broader categories in a way that is meaningful to your organization's reporting requirements.

### Secure data and reporting:

- expenses
- income
- in-kind assistance
- unmet need requests
